

Forum for Collaborative HIV Research

Review of Cardiovascular Disease Risk in Persons Living with HIV: From Research to the Clinic

July 18, 2010
Session Room 4
Vienna, Austria

Meeting Agenda

<u>Session I: Observational Cohort Studies</u>		
Goals: understanding potential increased cardiovascular risk in persons living with HIV Moderator: Veronica Miller		
1:30-1:40 pm	Introduction	Veronica Miller
1:40-1:45 pm	Patient's Perspective	Bob Munk
1:45-2:05 pm	Is There Increased CV Risk in Patients with HIV?	Wendy Post
2:05-2:15 pm	Statistical Standards for Observational Cohort Analyses	Jur Strobos
2:15-2:20 pm	Regulatory Role in Adverse Event Assessment	Linda Lewis
2:20-2:30 pm	Implications of Data Limitations on Practice Patterns, Guideline Development and Clinical Research	Filip Josephson
<u>Session II: Pathophysiology</u>		
Goals: understanding current hypotheses underlying potential increased cardiovascular risk Moderator: Nisha Chandra-Strobos		
2:30-2:35 pm	Pathology Underlying Myocardial Infarction	Nisha Chandra-Strobos
2:35-2:40 pm	Immune Activation in HIV Disease	Alan Landay
2:40-2:50 pm	Epidemiological Support for Pathophysiology of Potential CV Risk in the HIV Patient	Virginia Triant
<u>Session III: Clinical, Policy and Research Implications</u>		
Goals: understanding the evaluation and management of cardiovascular risk in persons living HIV Moderator: Judith Currier		
2:50-3:00 pm	Comprehensive Evaluation and Management of Cardiovascular Risk Factors	Nisha Chandra-Strobos
3:00-3:10 pm	Assessment and Treatment of Traditional Risk Factors in the HIV Patient	Wendy Post
3:10-3:20 pm	Implications for Anti-Retroviral Therapy	Judith Currier
3:20-3:30 pm	Discussion and Conclusions	Judith Currier, Virginia Triant, Wendy Post and Nisha Chandra-Strobos
